

# Intermediate Excel

---

In this lab, we are going to take a clean data set and begin to “interview” our data with more advanced functions. Using a hypothesis and questions, we are going to ask questions of our data to help us prove or disprove our hypothesis. We will be using calculations like summation and percentages and tools like filtering and sorting.

## Hospital and Beds Private and Government in Khyber Pakhtunkhwa

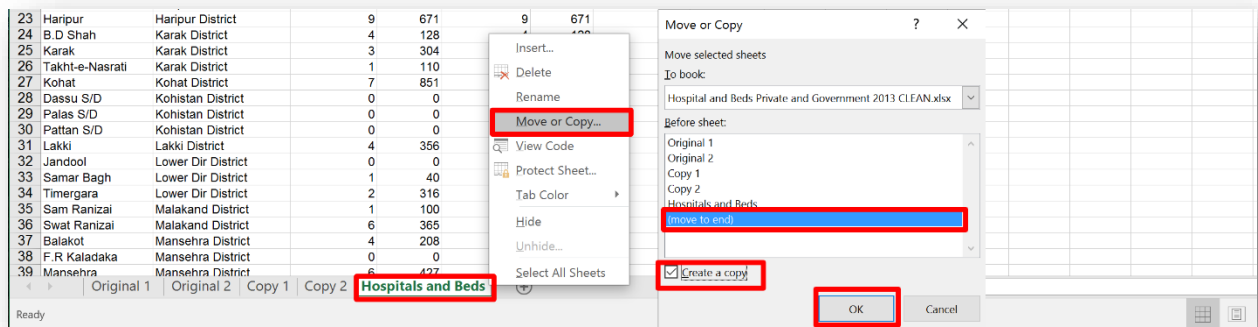

*Hypothesis: Access to hospitals is uneven across Khyber Pakhtunkhwa with both public and private hospitals concentrated in the most urban districts.*

- **Question 1:** What is the total number of hospitals and hospital beds in the province?
- **Question 2:** Which three districts have the highest number of hospitals?
- **Question 3:** Which three districts have the highest number of hospital beds? Which is a better measurement of access to hospital care?
- **Question 4:** Within the three districts with the highest number of hospitals, which tehsil has the most?
- **Question 5:** Within the three districts that have the highest number of hospital beds, which tehsil has the most?
- **Question 6:** Which district has the highest percentage of hospitals?
- **Question 7:** Which district has the lowest percentage of private hospital beds?
- **Question 8:** Which district has the highest percentage of private hospitals? and the lowest percentage?
- **Question 9:** What is the average number of total, private and public hospitals and hospital beds per district? And for the province?
- **Question 10:** Why would be adding population data be useful in proving or disproving our hypothesis?

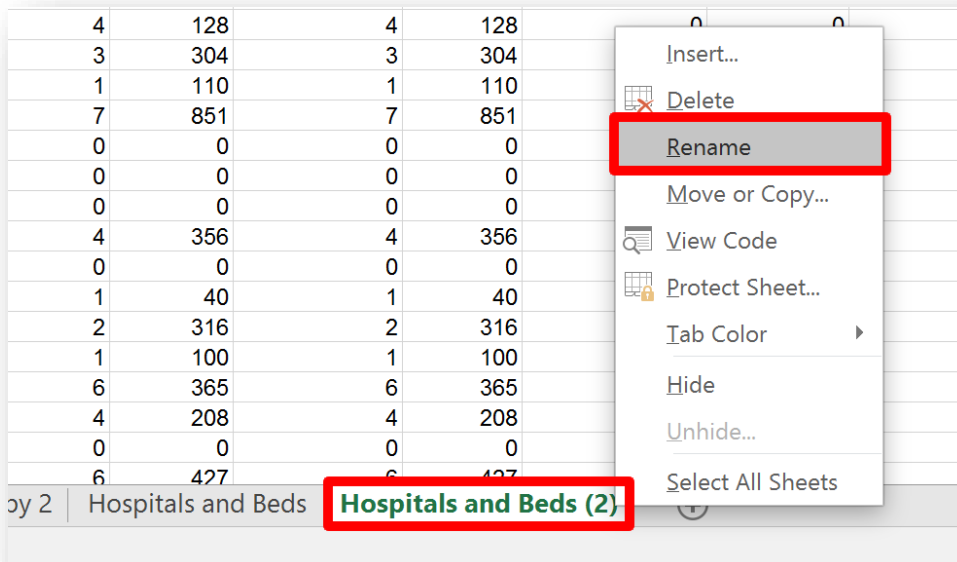

## ANALYSIS

**Question 1** What is the total number of hospitals and hospital beds in the province?

1. Open **Hospital and Beds Private and Government 2013.xlsx**. This data set should be clean as you worked on it in the Cleaning Data lab.
2. It is important for the data journalism fact checking process to document all the steps of your analysis. For this reason we ask you to create a separated sheet for every question. We are going to use the Move or Copy tool to avoid simple copy and paste mistakes. Go to Hospitals and Bed sheet, right click on the sheet and click on Move or Copy, select move to the end and create a copy, then click on OK.

3. Rename the new sheet “Hospitals and Beds (2)” as Q1. Right click on these sheet, click on Rename and change the name by Q1.

4. **Question 1** What is the total number of hospitals and hospital beds in the province? As you see column C and D have the total of hospital and hospital bed for each Tehsil, so what we need make a summation of all values in column C and D. Which cell address has the first value? Which cell address has the last? Select all cells between those two cell addresses. That is, select from C2 to C56.

5. Click and drag to from cell C2 to cell C56

C2    X    ✓    fx    10

10. Another way to calculate a total is using function call SUM. Go to cell D61 and Type =SUM(D2:D56). The formula means = insert function, SUM AutoSum, D2:D56 from cell D2 to D56. You also can select the cell and type the function in the Formula Bar

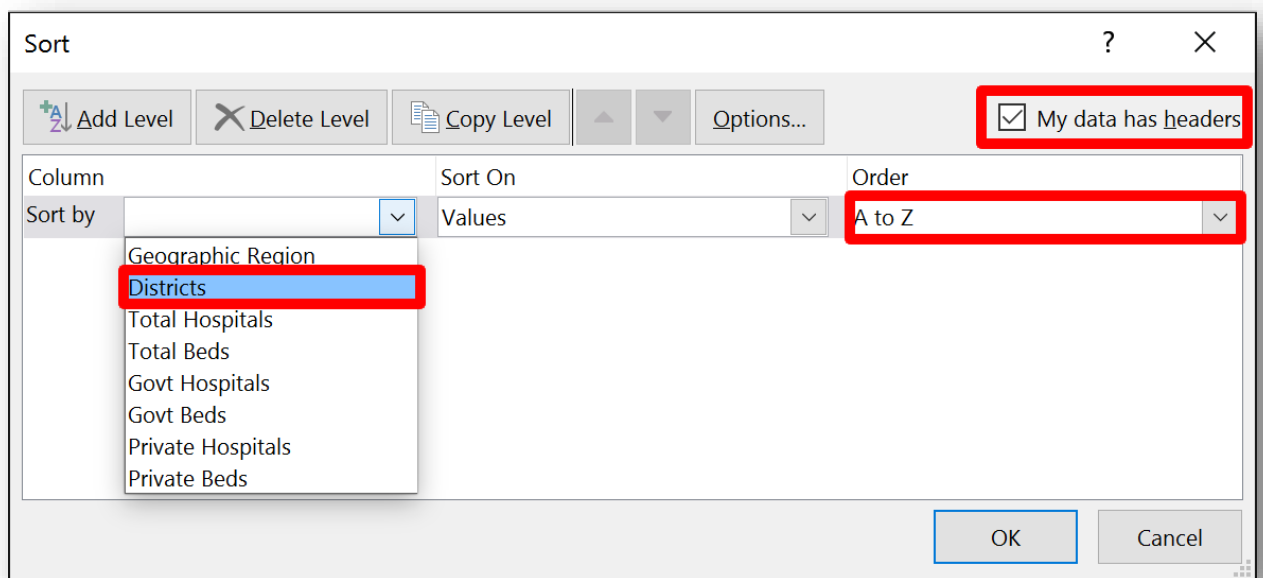

15. In the main menu go to Data - Sort & Filter – Sort

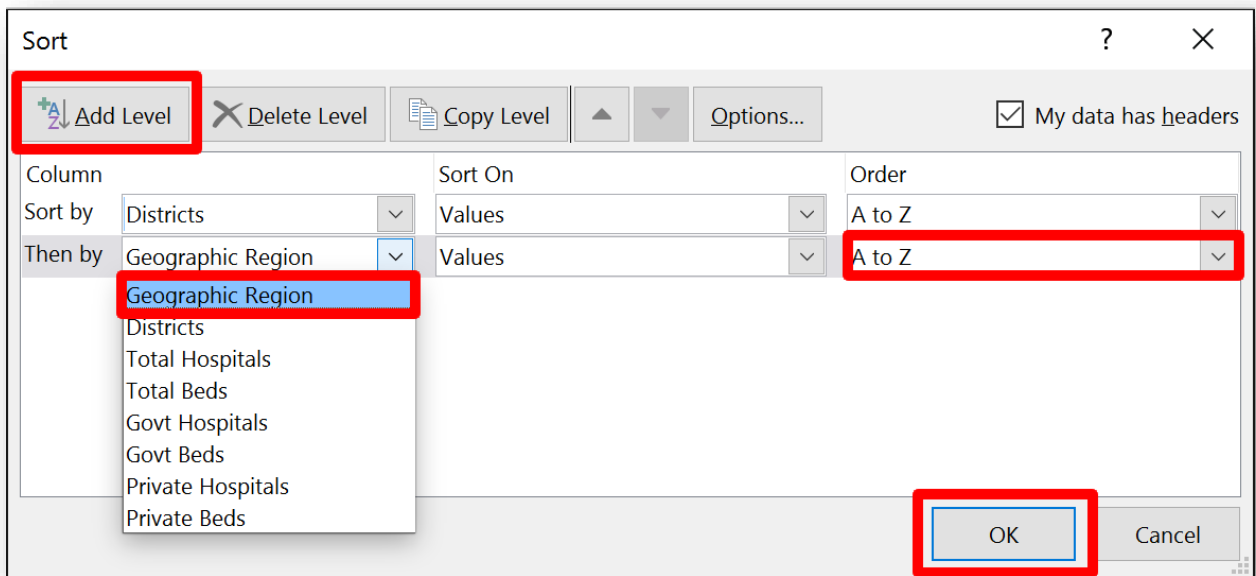

16. In the Sort window

- a. Be sure My list has headers is selected, because you do not want the headers mixed with the data.
- b. In the first menu: Sort by select District and Order A to Z

- c. Then, click on Add Level, in column select Geographic Region and Order A to Z. Click on OK

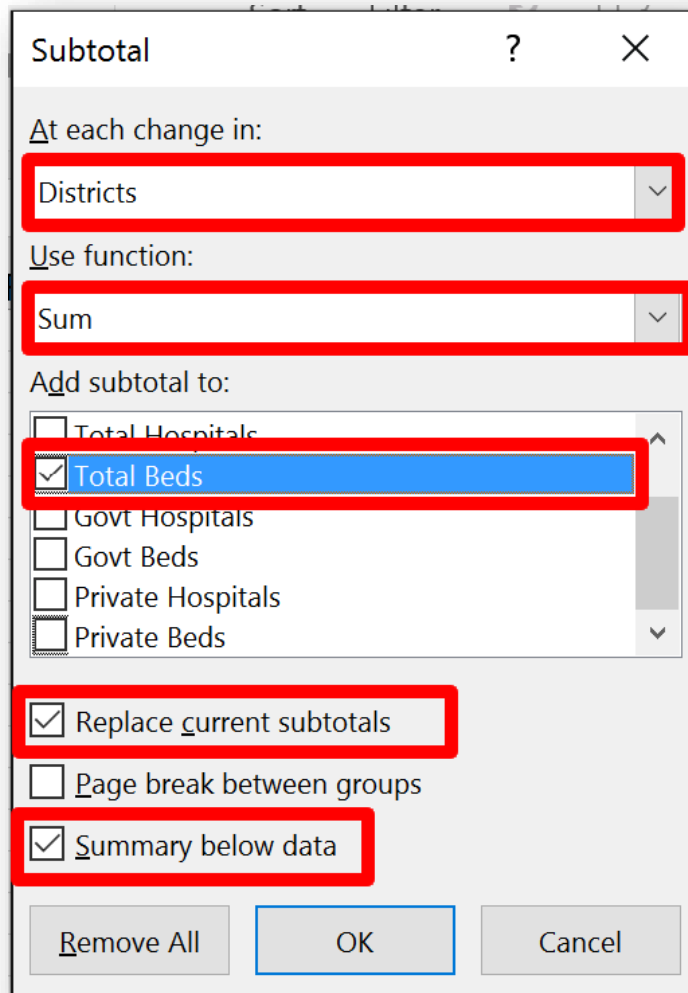

17. In the main menu go to Data – Outline and click on Subtotal

18. The subtotal window has a default configuration that probably isn't the one you are looking for, so double check before clicks on OK. In Subtotal window
- At each change in: select District because we want the subtotal for each district
  - Use function: use Sum, because we need a summation of total hospitals
  - Add subtotal to: Select Total Hospital because this column contains the number of total number of Hospitals and as question is requires
  - Leave select Replace Current Subtotals and Summary below data. Click OK

The image shows the 'Subtotal' dialog box in Microsoft Excel. The dialog has a title bar with a question mark and a close button. It contains three main sections: 'At each change in:', 'Use function:', and 'Add subtotal to:'. In the 'At each change in:' section, 'Districts' is selected in a dropdown menu. In the 'Use function:' section, 'Sum' is selected in a dropdown menu. In the 'Add subtotal to:' section, a list of options is shown with checkboxes: 'Total Hospitals', 'Total Beds' (which is checked and highlighted in blue), 'Govt Hospitals', 'Govt Beds', 'Private Hospitals', and 'Private Beds'. Below this list, there are three checkboxes: 'Replace current subtotals' (checked), 'Page break between groups' (unchecked), and 'Summary below data' (checked). At the bottom of the dialog are three buttons: 'Remove All', 'OK', and 'Cancel'.

Subtotal

At each change in:

Districts

Use function:

Sum

Add subtotal to:

☐ Total Hospitals

☒ Total Beds

☐ Govt Hospitals

☐ Govt Beds

☐ Private Hospitals

☐ Private Beds

☒ Replace current subtotals

☐ Page break between groups

☒ Summary below data

Remove All OK Cancel

19. As you can see now Excel added multiple rows as result of the Subtotal function, labeled as the district and Total and in bold. As example Buner District Total is 4 as a summation of 3 hospitals in Buner and 1 hospitals in Totalai Tehsils. Also there is another panel on the left side.

21. Leave the left panel on number (2) with the Total of Hospital by districts. Select Row 1 and in the Main Menu go to Data – Sort & Filter – Filter.

22. Headers in row 1 now have a small arrow in the corner; click on the triangle inside Total Hospitals column and click on Sort Largest to Smallest

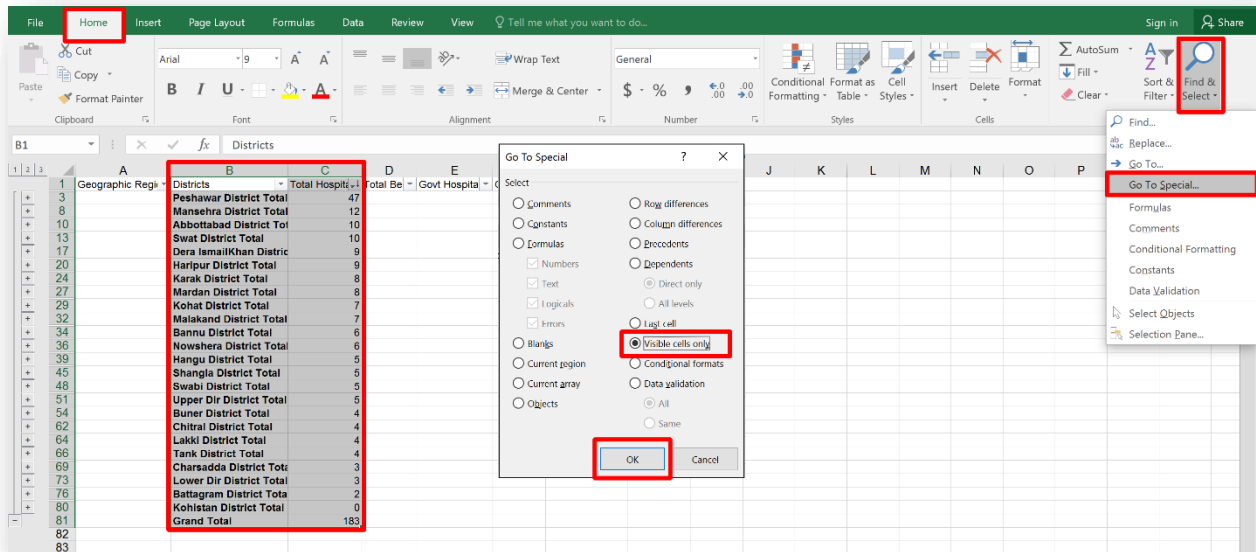

23. Question 2: Which three districts have the highest number of hospitals?

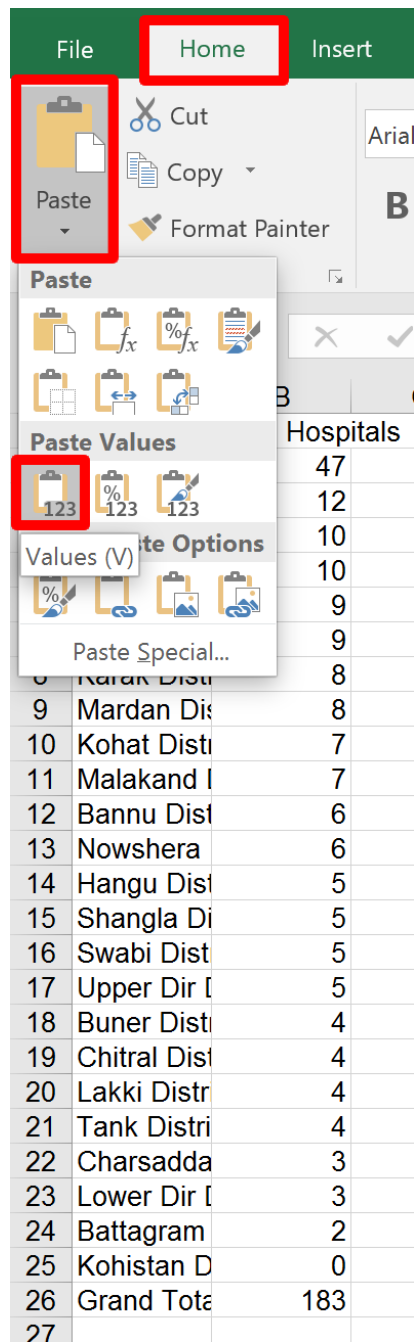

Districts	Total Hospitals
Peshawar District Total	47
Mansehra District Total	12
Abbottabad District Total	10
Swat District Total	10

24. But let's say than you need to copy the calculation we just made (the number of total hospital by districts) to create a chart, filters or do more calculations.

- a. Select the data
- b. In the Main Menu go to Home – Editing – Find & Select - Go to Special, in the Go to Special window select Visible cell only and click on OK

- c. Copy the selection
- d. Add another sheet
- e. Rename it as Q2.1
- f. In the Main Menu go to Home – Clipboard – Paste – Value

**Question 3:** Which three districts have the highest number of hospital beds? Which is a better measurement of access to hospital care?

25. Go to Hospital and Beds Sheet
26. Make a Copy of the Hospital and Beds Sheet by right-click on the sheet tab and select “(move to the end)” and Create a Copy, then click on OK
27. Rename the sheet Hospitals and Beds (2) as Q3 by right-click on the tab sheet and click on Rename. Select any cell with data.
28. In the main menu go to Data - Sort & Filter – Sort
29. In the Sort window

- a. Be sure 'My list has headers' is selected, because you do not want the headers combined with the data.
- b. In the first menu, Sort by select District and Order A to Z
- c. Then, click on Add Level, in column select Geographic Region and Order A to Z. Click on OK
- 30. In the main menu go to Data – Outline and click on Subtotal
- 31. The subtotal window has a default configuration that probably isn't the one you are looking for, so double check before clicks on OK. In Subtotal window
  - a. At each change in: select District because this is the column we need to focus on to answer question 3
  - b. Use function: use Sum, because we need a summation of total beds
  - c. Add subtotal to: Select Total Beds because this column contains the total number of beds as question is requires
  - d. Leave selected 'Replace Current Subtotals' and 'Summary below data'. Click OK
- 32. The panel in the left with the numbers 1, 2, and 3 provides different ways to see the data. For instance:
  - a. (1) is the Total of Beds in the Khyber Pakhtunkhwa province,
  - b. (2) is the Total of Beds by Districts, and
  - c. (3) is the full data set
- 33. Select number (2) with the Total of Beds by districts. Select Row 1 and in the Main Menu go to Data – Sort & Filter – Filter.
- 34. Headers in row 1 now have a small arrow; click on the one inside Total Beds column and click on sort Largest to Smallest
- 35. **Question 3:** Which three districts have the highest number of hospital beds? Which is a better measurement of access to hospital care?

Districts	Total Beds
Peshawar District Total	5179
Abbottabad District Total	1380
Bannu District Total	977

**Question 4:** Within the three districts with the highest number of hospitals, which tehsil has the most? To answer this question you can use the work you did in Question 2 just by adding the tehsils variable.

- 36. Go to Q2 Sheet
- 37. Make a Copy of the Q2 Sheet by right-clicking on the sheet tab and select "(move to the end)" and Create a Copy, then click on OK
- 38. Rename the sheet Q2 (2) as Q4 by right-clicking on the tab sheet and click on Rename.
- 39. Go to number 3 in the left panel (the one that shows the whole data set)
- 40. In the Main Menu go to Data – Outline – Subtotal
- 41. Change the Subtotal window as:
  - a. At each change in: select Geographic Region because this is the new variable to include
  - b. Use function: use Sum, because we need a summation of total hospitals
  - c. Add subtotal to: Select Total Hospitals because this column contains the number hospitals as the question is requires
  - d. **Uncheck Replace Current Subtotals.** Click OK

Subtotal ? X

At each change in:  
Geographic Region

Use function:  
Sum

Add subtotal to:  
☒ Total Hospitals  
☐ Total Beds  
☐ Govt Hospitals  
☐ Govt Beds  
☐ Private Hospitals  
☐ Private Beds

☐ Replace current subtotals  
☐ Page break between groups  
☒ Summary below data

Remove All OK Cancel

42. Go to number (3) in the left panel
43. As you see we just add Tehsil to Total of Hospitals

44. **Question 4:** Within the three districts with the highest number of hospitals, which Tehsil has the most?

Geographic Region	Districts	Total Hospitals
Peshawar Total		47
	Peshawar District Total	47
Balakot Total		4
F.R Kaladaka Total		0
Mansehra Total		6
Oghi Total		2
	Mansehra District Total	12
Abbottabad Total		10
	Abbottabad District Total	10
Matta Total		1
Swat Total		9
	Swat District Total	10

**Question 5:** Within the three districts that have the highest number of hospital beds, which Tehsil has the most? In these question you can use the work did in Question 3 just by adding the variable of Tehsils.

45. Go to Q3 Sheet
46. Make a Copy of the Q3 Sheet by right-clicking on the sheet tab and select “(move to the end)” and Create a Copy, then click on OK
47. Rename the sheet Q3 (2) as Q5 by right-clicking on the tab sheet and click on Rename.
48. Go to number 3 in the left panel (the one that shows the whole data set)
49. In the Main Menu go to Data – Outline – Subtotal
50. Change the Subtotal window to:
  - a. At each change in: select Geographic Region because this is the new variable to include
  - b. Use function: use Sum, because we need a summation of total beds
  - c. Add subtotal to: Select Total Beds because this column contains the number of beds as the question is requires
  - d. **Uncheck Replace Current Subtotals.** Click OK
51. Go to number (3) in the left panel
52. As you see we just add Tehsil to Total of Hospitals
53. **Question 5:** Within the three districts that have the highest number of hospital beds, which Tehsil has the most?

Geographic Region	Districts	Total Beds
Peshawar Total		5179
	Peshawar District Total	5179
Abbottabad Total		1380
	Abbottabad District Total	1380
Bannu Total		977
	Bannu District Total	977

**Question 6:** Which district has the highest percentage of hospitals?

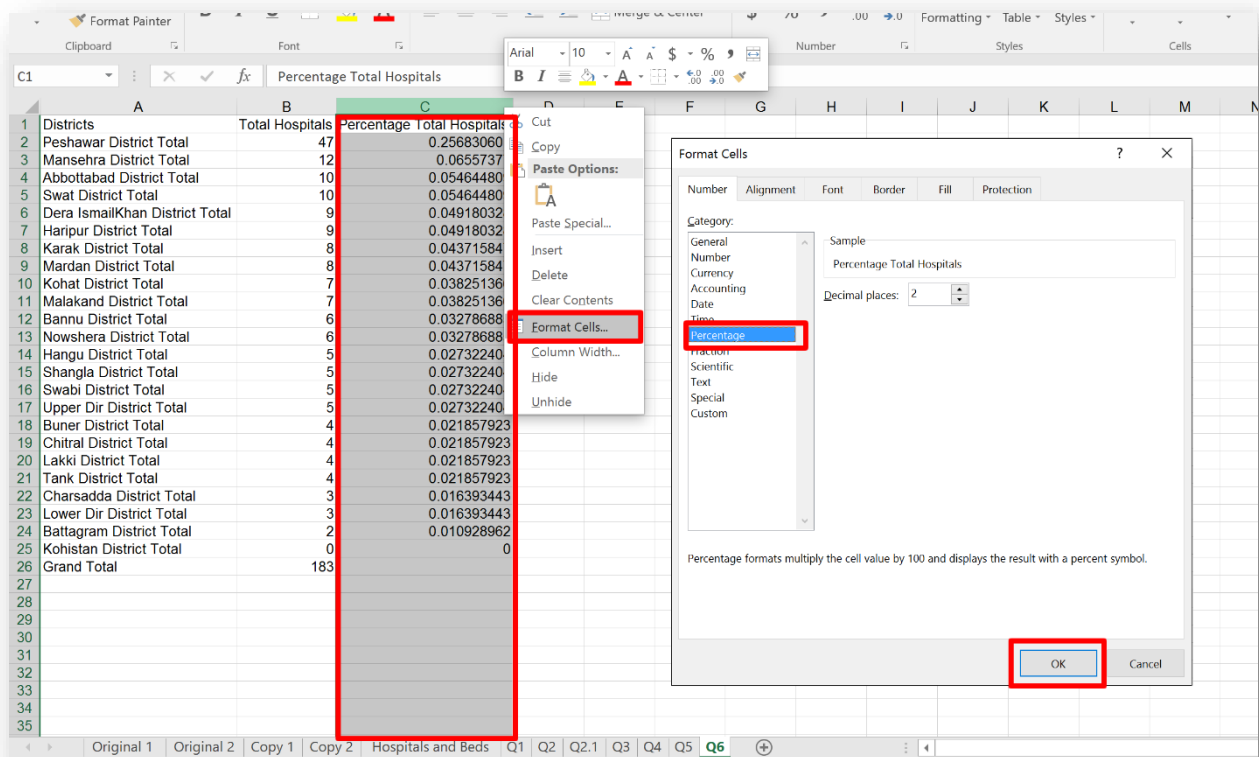

54. In number 24 we made another sheet with a copy of the Total of Hospital by district and we named it Q2.1 sheet. Go to Q2.1
55. Make a Copy of the Q2.1 sheet by right-clicking on the sheet tab and select “(move to the end)” and Create a Copy, then click on OK
56. Rename the sheet Q2.1 (2) as Q5 by right-clicking on the tab sheet and click on Rename
57. Name cell C1 as Percentage Total Hospitals
58. The question is about the percentage of hospital in each districts compared to the total in the province. In C2 use the Formula **=B2/\$B\$26**. It means, divide a part by the total, the part is the number of hospitals column B divided by Grand Total of hospitals in the province (cell B26).

AVERAGE		fx		=B2/\$B\$26	
	A	B	C		
1	Districts	Total Hospitals	Percentage Total Hospitals		
2	Peshawar District Total	47	=B2/\$B\$26		
3	Mansehra District Total	12			
4	Abbottabad District Total	10			
5	Swat District Total	10			
6	Dera IsmailKhan District Total	9			
7	Haripur District Total	9			
8	Karak District Total	8			
9	Mardan District Total	8			
10	Kohat District Total	7			
11	Malakand District Total	7			
12	Bannu District Total	6			
13	Nowshera District Total	6			
14	Hangu District Total	5			
15	Shangla District Total	5			
16	Swabi District Total	5			
17	Upper Dir District Total	5			
18	Buner District Total	4			
19	Chitral District Total	4			
20	Lakki District Total	4			
21	Tank District Total	4			
22	Charsadda District Total	3			
23	Lower Dir District Total	3			
24	Battagram District Total	2			
25	Kohistan District Total	0			
26	Grand Total	183			
27					

59. Copy the formula for the rest of the districts by moving the cursor across the bottom-right of the cell

C2				
	A	B	C	D
1	Districts	Total Hospitals	Percentage Total Hospitals	
2	Peshawar District Total	47	0.256830601	
3	Mansehra District Total	12		
4	Abbottabad District Total	10		
5	Swat District Total	10		
6	Dera IsmailKhan District Total	9		
7	Haripur District Total	9		
8	Karak District Total	8		
9	Mardan District Total	8		
10	Kohat District Total	7		
11	Malakand District Total	7		
12	Bannu District Total	6		
13	Nowshera District Total	6		
14	Hangu District Total	5		
15	Shangla District Total	5		
16	Swabi District Total	5		
17	Upper Dir District Total	5		
18	Buner District Total	4		
19	Chitral District Total	4		
20	Lakki District Total	4		
21	Tank District Total	4		
22	Charsadda District Total	3		
23	Lower Dir District Total	3		
24	Battagram District Total	2		
25	Kohistan District Total	0		
26	Grand Total	183		
27				
28				

60. Then change column C to a percentage. Select column C, right-click on the selected data, click on Format Cells and in the new window click on Percentage and OK

61. **Question 6:** Which district has the highest percentage of hospitals? **Peshawar District with 25.68%**

**Question 7:** Which district has the lowest percentage of private hospital beds?

62. Go to Hospital and Beds Sheet
63. Make a Copy of the Hospital and Beds Sheet by right-clicking on the sheet tab and select "(move to the end)" and Create a Copy, then click on OK
64. Rename the sheet Hospitals and Beds (2) as Q7 by right-clicking on the tab sheet and click on Rename. Select any cell with data.
65. In the main menu go to Data - Sort & Filter – Sort
66. In the Sort window
  - a. Be sure My list has headers is, because you do not want the headers combined with the data, in these case as another district or Tehsil
  - b. In the first Sort by select District and Order A to Z
  - c. Then, click on Add Level, in column select Geographic Region and Order A to Z. Click on OK
67. In the main menu go to Data – Outline and click on Subtotal
68. Subtotal window have a default configuration than most probably is not what you are looking for, so double check before clicking on OK. In the Subtotal window
  - a. At each change in: select District because this is the column we need to focus on to answer question 7.
  - b. Use function: use Sum, because we need a summation of Private Beds
  - c. Add subtotal to: Select Private Beds because this column contains the total number of Private Beds as the question requires

- d. Leave selected 'Replace Current Subtotals' and Summary below data. Click OK
69. The panel in the left with the numbers 1, 2, and 3 give a different view the data. For instance:
- (1) is the Total of Private Beds in the Khyber Pakhtunkhwa province,
  - (2) is the Total of Private Beds by Districts, and
  - (3) is the full data set
70. Go to number (2) in the left panel with the Total of Private Beds by districts
71. Hide Column C, D, E, F and G by selecting those columns right-click and click on Hide

	A	B	C	D	E	F	G	H
1	Geographic Region	Districts	Total Hospitals	Total	Govt Beds	Private Hospitals	Private Beds

78. Move data content in row 26 to row 29 to avoid including Grand Total in filters
79. Select Row 1, in the Main menu go to Home – Editing – Sort & Filter – Filter

80. Click on the small arrow inside the Private Hospital Column and Sort Largest to Smallest
81. Name Column C as Percentage of Private Beds
82. Use the formula for percentage  $=B2/ \$B\$29$  as explained in number 58.
83. Copy the formula for the rest of the districts by moving the cursor across the bottom-right of the cell as explained in number 59
84. Format Column as Percentage as explain in number 60
85. **Question 7:** Which district has the lowest percentage of private hospital beds in the province?

Districts	Private Beds	Percentage of Private Beds
Peshawar District Total	728	66.00%
Bannu District Total	150	13.60%
Tank District Total	85	7.71%
Mardan District Total	70	6.35%
Abbottabad District Total	50	4.53%
Nowshera District Total	20	1.81%
Battagram District Total	0	0.00%
Buner District Total	0	0.00%
Charsadda District Total	0	0.00%
Chitral District Total	0	0.00%
Dera IsmailKhan District Total	0	0.00%
Hangu District Total	0	0.00%
Haripur District Total	0	0.00%
Karak District Total	0	0.00%
Kohat District Total	0	0.00%
Kohistan District Total	0	0.00%
Lakki District Total	0	0.00%
Lower Dir District Total	0	0.00%
Malakand District Total	0	0.00%
Mansehra District Total	0	0.00%

Shangla District Total	0	0.00%
Swabi District Total	0	0.00%
Swat District Total	0	0.00%
Upper Dir District Total	0	0.00%

**Question 8:** Which district has the highest percentage of private hospitals? and the lowest percentage?

86. Go to Hospital and Beds Sheet
87. Make a Copy of the Hospital and Beds Sheet by right-click on the sheet tab and select “(move to the end)” and Create a Copy, then click on OK
88. Rename the sheet Hospitals and Beds (2) as Q8 by right-click on the tab sheet and click on Rename. Select any cell with data.
89. In the main menu go to Data - Sort & Filter – Sort
90. In the Sort window
  - a. Be sure My list has headers is, because you do not want the headers mix with the data as another component of the data, in these case as another district or Tehsil
  - b. In the first Sort by select District and Order A to Z
  - c. Then, click on Add Level, in column select Geographic Region and Order A to Z. Click on OK
91. In the main menu go to Data – Outline and click on Subtotal
92. Subtotal window have a default configuration than most probably is not the one that you are looking for, so double check before clicks on OK. In Subtotal window
  - a. At each change in: select District because these the column we need to focus on and as the question 8 is require
  - b. Use function: use Sum, because we need a summarization of Private Beds
  - c. Add subtotal to: Select Private Hospital because this column contains the number of total number of Private Beds as question requires
  - d. Leave select Replace Current Subtotals and Summary below data. Click OK
93. The panel in the left with the numbers 1, 2, and 3 give a different way to analyze the calculation just made. For instance:
  - a. (1) is the Total of Private Hospitals in the Khyber Pakhtunkhwa province,
  - b. (2) is the Total of Private Hospitals by Districts, and
  - c. (3) is the full data set
94. Go to number (2) in the left panel with the Total of Private Beds by districts
95. Hide Column C, D, E, and F by selecting those columns right-click and click on Hide
96. Select date in column B and G
97. In the Main Menu go to Home – Editing – Find & Select - Go to Special, in the Go to Special window select Visible cell only and click on OK
98. Copy the selection
99. Add another sheet
100. Rename it as Q8.1
101. In the Main Menu go to Home – Clipboard – Paste – Value
102. Move data content in row 26 to row 29 to avoid include Grand Total in filters
103. Select Row 1, in the Main menu go to Home – Editing – Sort & Filter – Filter
104. Click on the small arrow inside Private Hospital Column and Sort Largest to Smallest
105. Name Column C as Percentage of Private Hospitals
106. Use the formula for percentage =B2/\$B\$29 explained in number 58.
107. Move the formula for the rest of the districts by move the cursor the bottom-right of the cell as explained in number 59

108. Format Column as Percentage as explain in number 60
109. **Question 8:** Which district has the highest percentage of private hospitals? and the lowest percentage?

Districts	Private Hospitals	Percentage of Private Hospitals
Peshawar District Total	30	83.33%
Mardan District Total	2	5.56%
Abbottabad District Total	1	2.78%
Bannu District Total	1	2.78%
Nowshera District Total	1	2.78%
Tank District Total	1	2.78%
